## Safe water, always clean tank!

What many people do not realize is that the water quality in the clean water tank, especially at higher temperatures, can quickly deteriorate. As a result, contamination of the water, contamination of the tank and, in the worst case, an increased safety risk with regard to **legionella contamination**.

Tank-O<sub>3</sub> is safe, environmentally friendly and 100% natural. Tank-O<sub>3</sub> takes away

“water concerns”. At the start of the season, the clean watertank is rinsed thoroughly, then the Tank-O<sub>3</sub> system is switched on and the “water worries” for the rest of the season are over. Only top up with water and check the operation of the Tank-O<sub>3</sub> system every 2 to 4 weeks. It is no longer necessary to think about regularly adding “environmentally harmful” products. End of bad smell or bad taste of the water, tank and water always remain completely clean and **BIOFILM FREE!!** Tank-O<sub>3</sub> is better for you and the environment!

### User experiences:

In recent years, various customers have already preceded you with the purchase of the Tank-O<sub>3</sub> system. One of our customers: We have been in possession of the Tank-O<sub>3</sub> system since 2017 and this to our full satisfaction. Cleaning the tank is limited to flushing out floating debris that comes along with the water. There are no greasy

algae deposits in the water tank. You only occasionally put the ozone cell in the vinegar and everything still works perfectly in all these years.

Tank-O<sub>3</sub> can be easily installed in the tank by a handy, technical do-it-yourselfer. Despite this, our advice is to have the Tank-O<sub>3</sub> system installed by the dealer or maintenance company of your vehicle. They have the right tools and expertise. Installation instructions are included in each Tank-O<sub>3</sub> packaging, the installation is self-explanatory.

One-time investment for a minimum of 10 years. A safe, clean watertank without worries all year round, so you avoid unwanted doctor costs!

Where the Tank-O<sub>3</sub> system is for sale is stated on our website.
