

September 2025.

New owner Tank-O3 *fresh water system*.

Dear customer,

As of July 1st, 2025, Tank-O3 *fresh water system* from Geert de Bekker, part of CWR Systems BV, has been acquired by Chiel and Femke Van Oppen.

For you, as a customer, little will change; the email address and phone number will remain the same, only the owner and address will change. So, the website will remain the same, the service will remain the same, and the unique features of the Tank-O3 *fresh water system* will also remain the same!

Geert de Bekker, who has been past retirement for many years, is proud and very happy with the acquisition. Chiel and Femke demonstrate the same experience and enthusiasm as Geert. Service and reliability remain paramount, and they are always open for advice and a cup of coffee.

Chiel was raised in installation technology, where he joined his parents' company from a young age. This, combined with years of experience in yacht building, means he's no stranger to technology and water. Femke, co-owner of Tank-O3 *fresh water system*, works in education. Her strength lies in communication and organization. They both value customer contact and an open-door policy.

They've been working hard behind the scenes recently to ensure a smooth transition to Tank-O3 *fresh water system*. Geert has shared all the ozone knowledge he's acquired over the years and will, of course, always be available for advice if needed.

Geert de Bekker and his wife Francy would like to take this opportunity to thank all their clients for the trust they have placed in them and their company and wish everyone, along with Chiel and Femke, all the best for the future.

New address details of CWR Systems B.V. / Tank-O3 *fresh water system*

Chiel Van Oppen
Industrieweg 82
1525 RD Westknollendam
