

User experiences about the Tank-O3 system

20-02-2020, Pine van den Berg, Amsterdam:

*Tank-O3 is a fantastic system ... one of the best investments made for my bus.
I think it's a fantastic system and recommend it to everyone I meet.*

08-06-2020, Hans Coen Dekker, Santpoort:

Vehicle: MB Sprinter camper CS Cosmo with 150L plastic clean water tank

Installation of the Tank-O3 system: Easy to do yourself, do not forget to close the tank completely after installation

Operation: Meanwhile, 3 months continuous, without problems, silent, odorless, negligible power consumption, effectively keeps water clean and fresh, recently removed limescale from the core, 15 min job

Maintenance: Low frequency, simple and well described in the documentation on the web site, parts easily available

Service: Excellent website, good accessibility, friendly thinking mentality

Summary: excellent thing!

14-06-2020: Cees Manders, Esch:

Now, after two and a half years of use, I am still very satisfied with the use of the Tank-O3 purification system. The tank and pipes remain clean and the water remains fresh. We use the Tank-O3 system at least 7 to 8 months a year, so a real endurance test. In Spain we had little trouble with limescale, in contrast to France where we had a lot of limescale. Then descale the system once more, no problem.
